Thanks Tammy,

I will help you in anyway to bring some common sense to these issues. I want nothing more than to protect our remote wilderness and fresh water supplies from wreckless people. We certainly have a gift here in Newfoundland lets keep in great shape for future generations. Thats why we need a long term solution here not bandaid one. I hope the Buck Stops Here. If people are that wreckless in our communities what would happen to our remote wilderness areas if we allowed more easy access? Scary!!

Yours in Conservation Tony

Hi Tony,

I put in a request for Eastern Waste Management Strategy to look a this from a long term perspective. As for removal of the waste there now, I am working on it. Hope to chat to yourself or Ray soon.

Regards,

Tammy McDonald

Hi Tammy,

Hope all is well. Emailed Raymond about these issues. He is fully aware whats on the go here. How did you make out after our meeting? Hopefully we can make some head way on these environmental safety issues. Due diligence on behalf of government and all involved is whats important here. Everyone is responsible for their own and everyone else's environmental health and safety. It's that simple. If certain people are not good for conservation then we have to protect our wild areas come hell or high water. Please feel free to email me on these matters.

Yours in Conservation Tony

Tony, Just getting back from the west coast after two weeks of touring, but felt the need to respond to your email.

Yes! The garbage along our coast is indeed gone out of wack The clcc have been following up on this and hope to come to grips with the problem as soon as possible. Re: the droke, I spoke to the North Shore Development about the brook site and they informed that they would be looking into it. I know the road leading to the droke a been upgraded.

With regards to meeting with Tammy, that is a sure thing as soon as I am able to set up a time outside the bands tight schedule. I leave for Grandfalls next Tuesday.

Meanwhile, it is always a pleasure to hear back from you Tony as you are indeed an activist in helping educate people who need to clean up thier act.

Talk to you soon.

Ray

Hi Ray,

Hope all is well. Had a meeting with Tammy McDonald of Gov Services in Harbour Grace. I showed her the dump sites on the North Shore that have to be cleaned up. I also showed her the Droke in Jobs Cove and the garbage dumped in the brook and over the hill. There is enough scrap metal between Western Bay and Low Point to keep a crusher busy for a while. She expressed interest in meeting you and your group on the Droke issue, in-discriminative dumping and car wrecks. Very important that this is acted upon soon. Gone on long enough. Can we clean up our communities, wild areas once and for all and put laws in place so wreckless people can never do this again. HER NUMBER IS 945-3107
