

Letter Charlene emailed me (no action)
August 2, 2008

Hi Charlene,

This is a old letter you sent me April 20 th 2007 on the garbage dump in front of my house. Due to lack of interest and prompt action people around construed that this is perfectly legal. No one for a minute would have this on the job site or in his or her office. What's it going to take for people and all involved to get the ball rolling? A Tsunami!! Given the number of incidents and infractions on the North Shore, if this place were a job site, it would be shut down immediately. Is our government and it's citizens in a state denial. The Cod fishery is big enough of a mistake, should Cliffty Pond and other places like it, be one to. Don't open more areas to indiscriminative dumping. How much proof do you need?? My web site pics are full of incidents and infractions. The folks garbage in the pics have no regard for their own environment let alone the water safety of future generations. How dangerous can one be? Water safety is the key, like the no smoking bylaw.

YOURS IN CONSERVATION TONY

Hi Tony:

Looks like the ball is rolling again on the mess around the bus near your house. Dept. of Environment and Government Services met back in December on this but when winter set in they put it off until now. They will be working on my request to look into this and they will keep me updated so I will inform you as they get back to me.

Have a good weekend...Charlene
